### **EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Atty. Nancy Klembus on December 20, 2007. The application has been amended as follows: In line 10 of claim 13 (newly-numbered claim 1), Item (e), insert -- at -- after having and before a, such that the phrase reads "...said first portion having at plurality of spaced..." Furthermore, in line 11 of claim 13 (newly-numbered claim 1), Item (e), delete the word [and] between locations and a, such that the phrase reads "...locations and a single hole..." and in line 12, correct the word "pluality" to state "plurality."

### ***Allowable Subject Matter***

Claims 13 and 20 are allowed. The following is an examiner's statement of reasons for allowance: Applicant has amended independent claim 13 to include allowable subject matter indicated by the Examiner in the previous office action. As stated in the previous office action, the closest prior art references of Hodan, et al., Meidhof, or Stevenson, et al. teach an insert, wherein the insert is a rod, said rod having at least a first portion and a second portion, along said length, said first portion having at a plurality of spaced apart locations, a single hole through said diameter, and a second portion having at a plurality of spaced apart locations at least two holes through said

diameter. The secondary reference of Stevenson, et al. teaches an adjustable insert rod which can be rotated to align a feed passage and opening to a die head. One such opening may be present (item 34 – figure 4) or two such openings may be present (items 34' and 40 - figure 7); however, the reference does not teach having at a plurality of spaced apart locations a single hole through said diameter and a second portion having at plurality of spaced apart locations, at least two holes.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
